EXAMINER'S REMARKS

1. The following is an Examiner's Statement of Reasons for Allowance:

The claims are considered allowable over the prior art of record, particularly CA 2085064, in view of the removal of the new matter from claims 1 and 15 and again in view of the remarks filed 26 SEP 2005. CA '064 refers to the inserts as "screen mesh inserts 200" which are excluded from the scope of the recited "not a mesh so that the material is imperforate" (in instant claim 1, as amended). Furthermore, the holes or openings in said screen mesh inserts of CA '064 would be wholly incapable of casing the injection of jets of fluidizing liquid through the holes in the insert member into the volume as argued by Applicant.

With regard to claims 15-17 and 19-20 and the remarks filed 26 SEP 2005 related thereto, the intended cooperation between the insert member and the centrifuge bowl breathes life and meaning into the claims to distinguish over the prior art. Hence, the intended use language in claims 15-17 is afforded a distinguishing limitation as the body of these claims sets forth structure of the insert member that refers back to and draws life and meaning from said language and thus the limitations in the bodies of the claims are deemed to limit the insert member to the environment and use specified in the context of the claim. Furthermore, the preamble is considered to bestow patentable weight to the claim since the language in the body of the claim regarding the insert member depends on the preamble (the environment of the recited centrifuge apparatus) for antecedent basis (*Bell Communications Research, Inc. v. Vitalink Communications Corp.*, 34 USPQ2d 1816, 1820 (Fed. Cir. 1995)).
